

Advances in Geocomputation: Geocomputation 2015--The 13th International Conference (Advances in Geographic Information Science)

Since 1996, the members of the GeoComputation (the art and science of solving complex spatial problems with computers) community have joined together to develop a series of conferences in the United Kingdom, New Zealand, Australia, Ireland and the United States of America. The 2015 conference ? the 13th International Conference of GeoComputation ? will be held at The University of Texas at Dallas from May 20 23, 2015. The conference encourages diverse topics related to novel methodologies and technologies to enrich the future development of geocomputation research. This book will be a refereed proceedings from the 2015 conference.
