

DB2 9.7 for Linux, UNIX, and Windows Database Administration: Certification Study Notes

The relational database-management system DB2 9.7 is given detailed and comprehensive treatment in this exam-preparation resource. Compiled from presentation material used in the popular Crammer Course at the IBM Information On Demand Conference, everything required for certification is presented here, including server management, design, business rules implementation, activity monitoring, security, and networking. An essential resource, this guide is helpful when studying to pass the official DB2 9.7 for LUW DBA certification exam.
