

Lab Manual for Network+ Guide to Networks, 5th (Test Preparation)

The Lab Manual for Network+ Guide to Networks, Fifth Edition provides students with the hands-on experience they will need to become successful network administrators. Students will gain experience configuring network protocols and services using today's most common network operating systems, including Windows Server 2008 and Fedora Linux. Students will learn how to install and configure network protocols such as TCP/IP, add Windows Vista and XP clients to networks, add users, configure network security policies, install and configure wireless routers, troubleshoot networks, and much more.
