# Classic Tutorial of Software Testing Technology (2nd Edition for Senior Software Test Engineer) (Chinese Edition)

This book is comprised of four parts. Part one mainly introduces software testing of its basic concept, classification and commonsense as well as black box testing technology, defect management, testing management, and testing tools, etc. Part two discusses LoadRunner 11.0 testing method and TestDirector 8.0, etc. from black box testing tool. Part three briefly introduces white box testing with its BoundsChecker tutorial, Logiscope 6.1 tutorial, and JTest 7.0 tutorial, etc. Part four gives testing in English which is the first-hand information for internal training in well-known foreign enterprises. The book is suitable for software testing engineers, testing managers developing engineers, and project managers, etc.
